WE APPRECIATE YOUR BUSINESS. THANKS.

Information from each Invoice can be immediately captured and intelligently distributed among ALL your key databases and applications.

P2P with EIP Helps Departments, Personnel, and Processes Improve:

Corporate Planning

- Analytics regarding supplies, pricing, quality of materials, delivery dates, and shipping costs becomes easily accessible
- Tap hidden intel to reveal opportunities for quantity discounts and rebates automatically
- Comprehensive data in ERP system enables leaders to optimize supply chain
- Intelligent document imaging helps leaders build a more competitive organization

Procurement

- Invoices are captured/processed faster and in greater volume
- Analytics can be used to request more competitive bids from suppliers
- Detailed process facilitates strict controls to maximize organizational compliance

Accounting

- Sharply reduces time fielding requests on status of an Invoice
- All business users can access documents internally as needed
- Confirm supplies are received in good condition before payment is approved
- Invoice automatically approved according to terms of Supplier Contract
- Payment scheduled to execute close to due date to help maximize cash flow
- Improve first time three-way match rate
- Reduce exceptions to protect budgets
- Late charges eliminated because payments are routinely made on time

Receiving

- Goods Received Note is matched against a P.O. so payment approval process is streamlined

Select Your Procure-to-Pay Solution with Care

A comprehensive, automated Procure-to-Pay solution enables you to dramatically improve invoice handling and related P2P processes.

A Procure-to-Pay solution leveraging Enterprise Imaging Platform enables your business to intelligently capture key information from documents and share it among applications. This will help you to reduce costs, streamline processes, improve working capital, optimize asset usage, and much more.

Enterprise Imaging Platform is a value-added middleware that automates complex business processes by integrating enterprise applications and document-based information flows.
