

# Have You Resolved these 3 Procure-to-Pay Challenges?

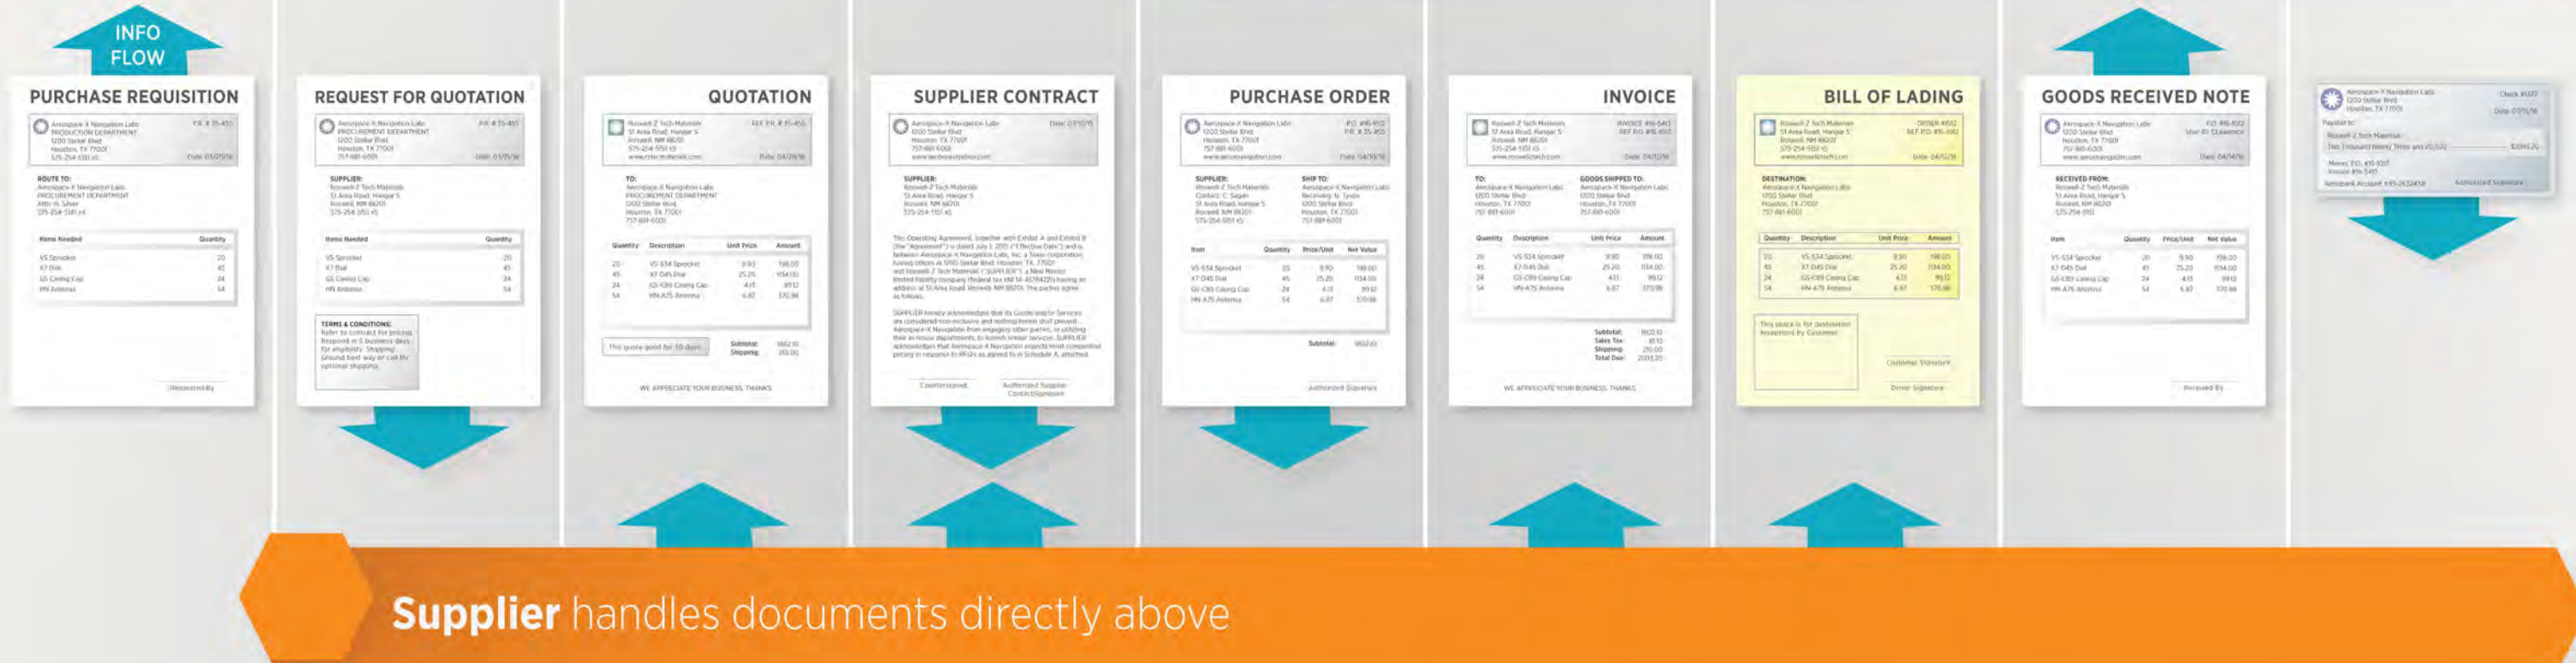

## Planning

Procurement Department handles documents directly below

## Challenge #1: DOCUMENTS

The P2P function typically involves key info from paper documents. Each document features several important data points worth capturing and integrating to ERP and other systems. But too often it is done manually.

Accounting Department handles documents directly below

## Challenge #2: EXCEPTIONS

More exceptions = more expenses. Inaccurate scans, mismatches, and other errors found in the three-way match process get the issue kicked back for manual review.

## Select Your Procure-to-Pay Solution with Care

A comprehensive, automated Procure-to-Pay solution enables you to address three big challenges inherent to the function.

That's why Enterprise Imaging Platform is being so well-received among manufacturers, accounting, and procurement departments.

We've combined the latest Canon imaging technology with a proven Oracle processing engine, so business decision makers have access to a powerful, integrated solution.

The Enterprise Imaging Platform Procure-to-Pay solution helps you to reduce cost, streamline processes, improve working capital, optimize asset usage, and much more.

Customer Relationship Management (CRM)

Enterprise Resource Planning (ERP)

Document Management System (DMS)

Accounting System

## Challenge #3: CLOSED SYSTEMS

Many P2P systems focus too much on just the payment. Connecting your P2P function with other mission critical systems like CRM, ERP, DMS, and accounting would greatly benefit your business.
