

ADVANCED SOLUTIONS FOR HEALTHCARE

Simplify and Expedite Paper-to-EHR Workflows

We are implementing an electronic health records system. But hard-copy documents remain integral to our day-to-day processes.

We must exchange faxes and e-mailed documents with labs, pharmacies, and other practices regularly. How can these documents be automatically integrated into our EHR system?

How can we reduce paperwork for our clinical staff so they can spend more time caring for patients?

We need a quicker, easier way to enter admission forms and other documents into our EHR.

Paperwork causes delays in many departments of the organization. How can we simplify and automate document workflows for all?

GET ADVANCED

The role of paper in healthcare is changing. As adoption of electronic health record systems (EHRs) continues to increase, healthcare providers must integrate paper from test results, referrals, reports, and more into these electronic systems to ensure a comprehensive view of each patient's medical record.

To complement your efforts to demonstrate meaningful use, Canon and Nuance have a compelling solution for integrating this unstructured documents into your EHR. The paper documents you handle while providing care to your patients can be intelligently scanned at your Canon imageRUNNER ADVANCE device with the embedded Nuance eCopy ShareScan for Canon MEAP and sent with metadata to your EHR as a standardized HL7 CDA document.

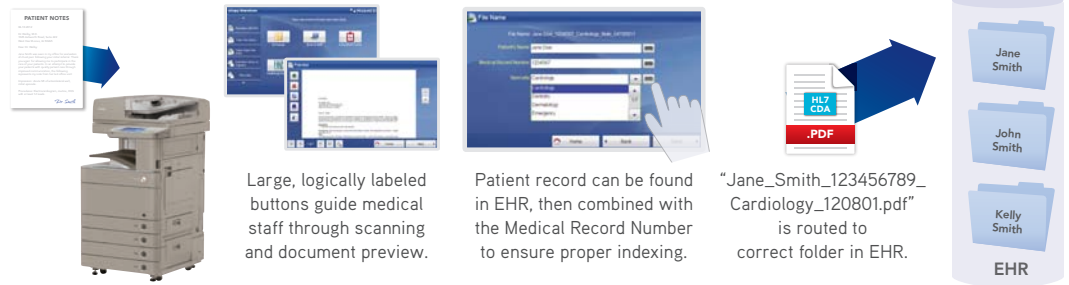

Our Professional Services teams can help your organization create customized buttons to help integrate paper-based information into your document repository.

Scan and Route Medical Documents Directly to Your EHR—Quickly and Easily

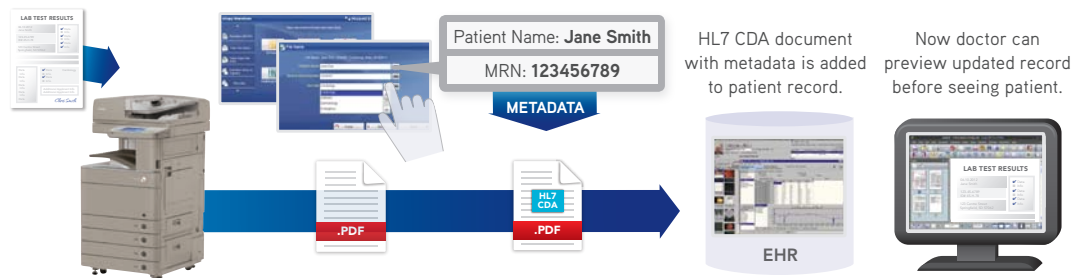

With a Canon imageRUNNER ADVANCE device and Nuance eCopy ShareScan, converting hard-copy medical documents into actionable patient information in your EHR is more efficient than ever.

Our Professional Services team can help you compress a complex, medical forms workflow into a few simple button presses.

Integrate Unstructured Paper Records into Your EHR Conveniently As You Work

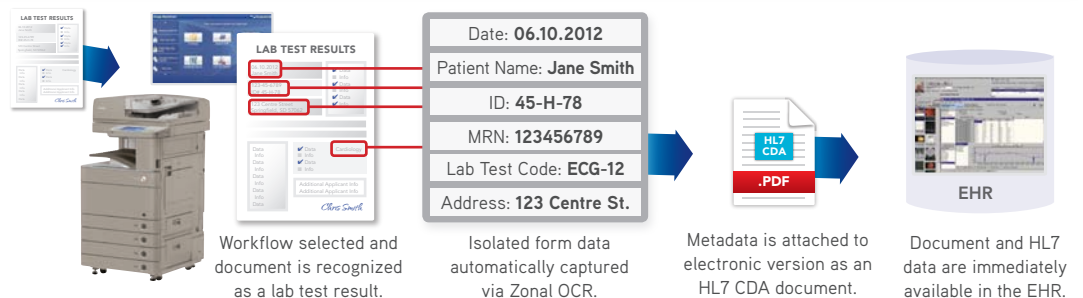

By simplifying how medical documents are attached to patient records and EHRs, clinical staff are empowered to add critical documents on a regular and consistent basis. This means that information is put into a format that can be easily and accurately exchanged with EHRs, HIEs, and other health record databases.

Spend Less Time Managing Paper and More Time Helping Patients

Why waste time managing paper when document processes can be automated? The Canon and Nuance solution can identify your different documents and intelligently capture the relevant information for your EHR in HL7 CDA format.

This results in a more productive practice, with patients receiving faster, higher-quality care.
